

# 2026 OUTLANDER PHEV

---

An aerial photograph of a long, winding bridge spanning a body of water. The sun is low on the horizon to the left, creating a bright, golden glow and reflecting off the water's surface. A single car is visible driving on the bridge. The surrounding landscape is rugged and rocky, with some vegetation. The overall mood is serene and adventurous.

# The Future Of Mobility Is Now

The Outlander PHEV is the smart bridge to an electrified future, where advanced electric efficiency meets the long-range confidence and freedom of traditional power.

Designed for eco-minded drivers who want to reduce emissions and fuel costs without compromising performance or range, the Outlander PHEV delivers the ultimate flexibility in smooth, quiet electric driving for everyday journeys and effortless hybrid capability for longer family adventures.

# Quiet, Efficient & Powerful Performance

The Outlander PHEV incorporates Mitsubishi Motors' latest EV technologies and a high efficiency gasoline engine to deliver quiet, efficient, and powerful road performance while eliminating range anxiety. The result is a refined performance that feels smooth, responsive, and effortlessly capable—no matter where the road leads.

## 22.7 kWh Drive Battery

Powers both front and rear motors; located below the cabin's floor to maximize interior space and lower the centre of gravity for enhanced vehicle stability.

## Front & Rear Electric Motors

Uniquely balanced twin-electric motors are the key to the Super All-Wheel Control system, allowing for superior control, exhilarating acceleration, excellent efficiency and balance.

## 2.4L Engine

Provides supplemental power only when you need it, either by powering the front wheels with support of the electric motors, providing engine-generated electricity to power the electric motors, or supplying electricity to recharge the drive battery via the on-board generator.

## Super All-Wheel Control

Building off a legacy of off-road rally and endurance racing excellence, Mitsubishi Motors' patented Super All-Wheel Control system leverages a suite of innovative technologies to deliver a superior driving experience, regardless of road or weather conditions.

With the twin electric motors seamlessly managing speed and braking force at each individual wheel to maximize traction, the Super All-Wheel Control system provides enhanced safety and peace of mind through increased stability, responsive handling and the confidence that you are in total control of your driving.

### 4WD

4WD – directs torque between the front and rear axles when wheel slippage is detected, to enhance overall traction. This is especially useful when accelerating from a stop on slippery surfaces, or climbing a hill covered in ice or snow.

### ASC

Active Stability Control (ASC) – works with Outlander PHEV's ABS to help counteract slipping or loss of control in adverse driving conditions and during emergency maneuvers by constantly monitoring available traction, keeping the vehicle moving in the intended direction.

### ABS

Anti-Locking Braking System (ABS) – prevents the wheels from locking up under heavy braking, or while braking on slippery road surfaces, allowing them to continue turning, providing greater control while stopping in an emergency.

### AYC

Active Yaw Control (AYC) – a torque-vectoring technology that manages the left-to-right driving and brake forces by applying the braking system at each individual wheel as required. This allows the vehicle to continue comfortably and true to the driver's intended path on slippery curves, icy roads and uneven terrain.

## Put yourself in control with SEVEN driver selectable modes accessible at the turn of a dial.

Unique driver selectable modes fine tune the gasoline engine and electric motor output, traction, cornering, and stability of the vehicle, to provide a confident ride regardless of the terrain or driving situation.

# Go Further... For Less

Frequent stops at the gas station are a thing of the past: with zero fuel consumption and zero CO<sub>2</sub> tailpipe emissions while driving in electric-only, and an exceptionally quiet ride delivered by the powerful twin-electric motors. The Outlander PHEV boasts a remarkable EV fuel efficiency equivalency rating of just 3.2 L<sub>e</sub>/100 kms and an estimated 72 km on electric power alone<sup>2</sup>.

The advanced PHEV system automatically switches between three EV modes based on the driving situation and current state of charge of the drive battery, so you can simply drive and get the best balance of performance and efficiency.

**EV Drive Mode**  
Prioritizes electric-only driving. When the Outlander PHEV is driving in electric-only, it has zero fuel consumption and zero CO<sub>2</sub> tailpipe emissions.

**Series Hybrid Mode**  
Uses engine-generated electricity to power the electric motors. This provides an additional boost when more power is needed, including when driving uphill and accelerating.

**Parallel Hybrid Mode**  
The engine powers the front wheels, with assistance from the electric motors when extra power is needed. Excess energy is used to charge the lithium-ion battery when driving in this mode.

## Power Management Made Easy

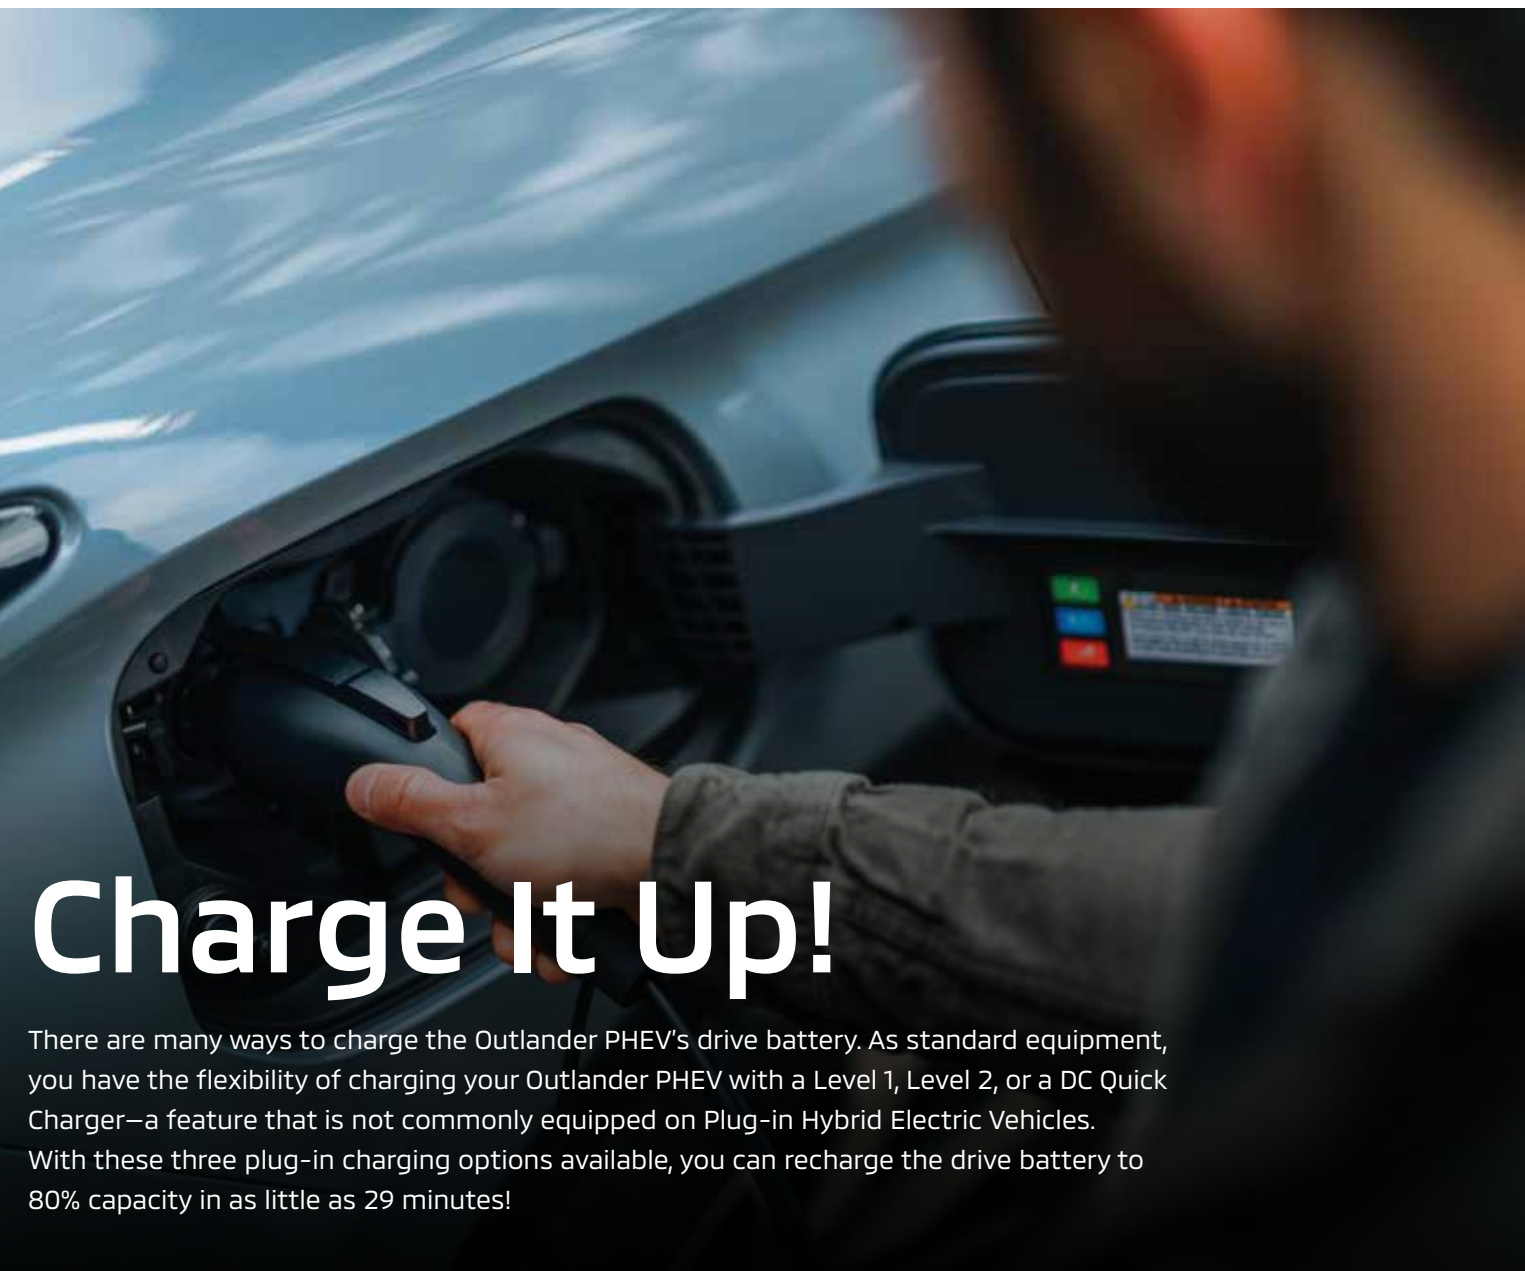

The Outlander PHEV will automatically deliver optimal efficiency based on driving conditions, however you can choose to be more engaged with additional driver selectable EV power management modes available at a press of a button:

**EV Priority Mode**  
Focuses on electric-only driving for maximum efficiency and eco-conscious travel.

**Charge Mode**  
Replenishes the battery using the gas engine when charge is low.

**Save Mode**  
Preserves battery power for moments when electric driving is most effective.

# Charge It Up!

There are many ways to charge the Outlander PHEV's drive battery. As standard equipment, you have the flexibility of charging your Outlander PHEV with a Level 1, Level 2, or a DC Quick Charger—a feature that is not commonly equipped on Plug-in Hybrid Electric Vehicles. With these three plug-in charging options available, you can recharge the drive battery to 80% capacity in as little as 29 minutes!

The Outlander PHEV also includes smart features that allow you to charge on-the-go, either by using the driver selectable Charge Mode, or by using the Regenerative Braking system:

**Paddle Shifters**  
The paddle shifters adjust the regenerative brake level setting. Different settings determines the amount of energy recaptured, and the degree of deceleration experienced when your foot is lifted off the accelerator.

**Innovative Pedal**  
Acceleration and deceleration can be controlled by the accelerator pedal alone. When decelerating, regenerative braking and friction brakes will be used to recharge the drive battery and slow the Outlander PHEV to almost a complete stop<sup>†</sup>. The Innovative Pedal also provides an additional “fun-to-drive” factor, allowing the driver to focus on the road and utilize one-pedal operation to slow the vehicle as necessary.

<sup>†</sup>Application of the brake pedal is still required to bring the vehicle to a complete stop.

# Designed for presence. Engineered for comfort.

Redefine the modern driving experience with a blend of bold style and smart innovation. The signature Dynamic Shield design frames a vehicle built for presence, while the sophisticated interior surrounds you with rich materials, exquisite craftsmanship and purposeful comfort.

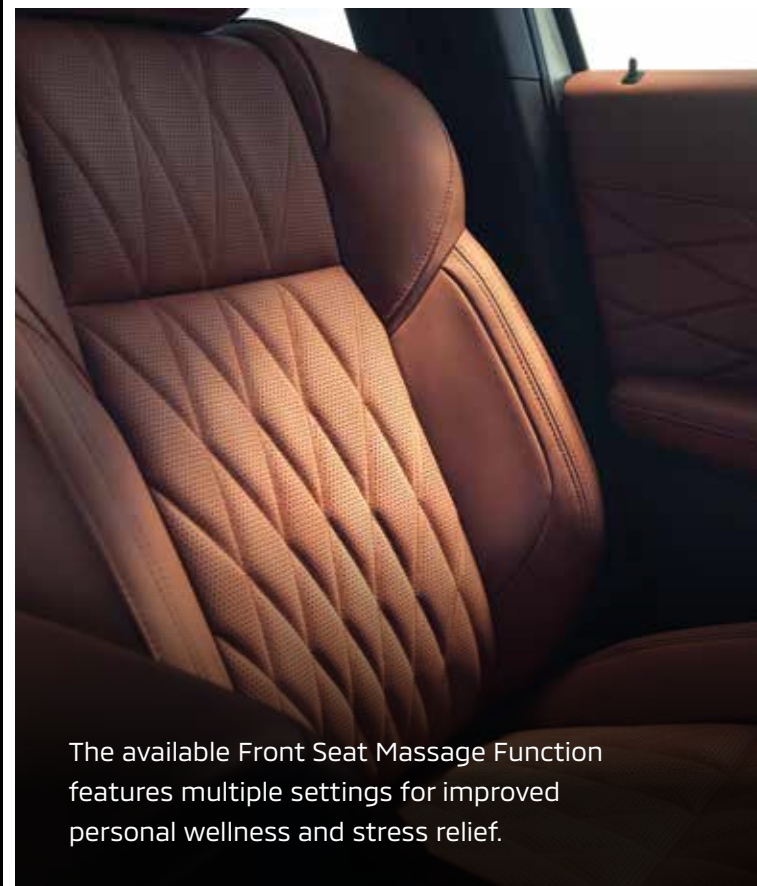

## Ventilated Seats

The available Leather-Appointed Ventilated Front Seats circulate air through the bottom and seatback cushions, providing a much more comfortable ride on hot summer days.

## Heated Front Seats, Available Heated 2nd Row Seats, Heated Steering Wheel and 3-Zone Climate Control

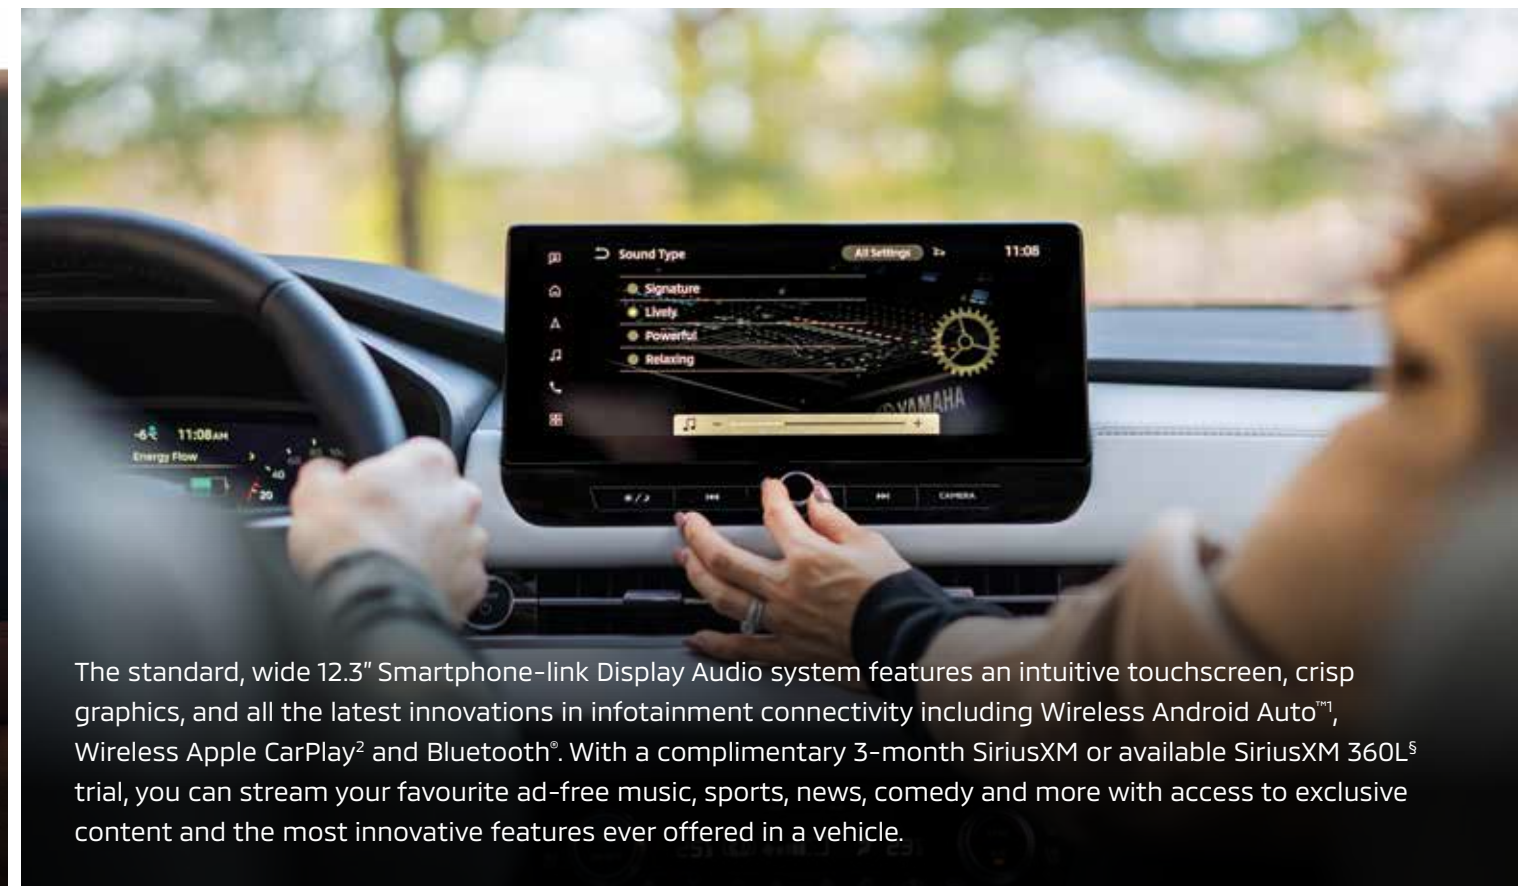

The Outlander PHEV's standard Heated Front Seats, available Heated 2nd Row Seats, Heated Steering Wheel and 3-Zone Climate Control keep occupants comfortable and warm, from cooler fall days to blustery winter weather.

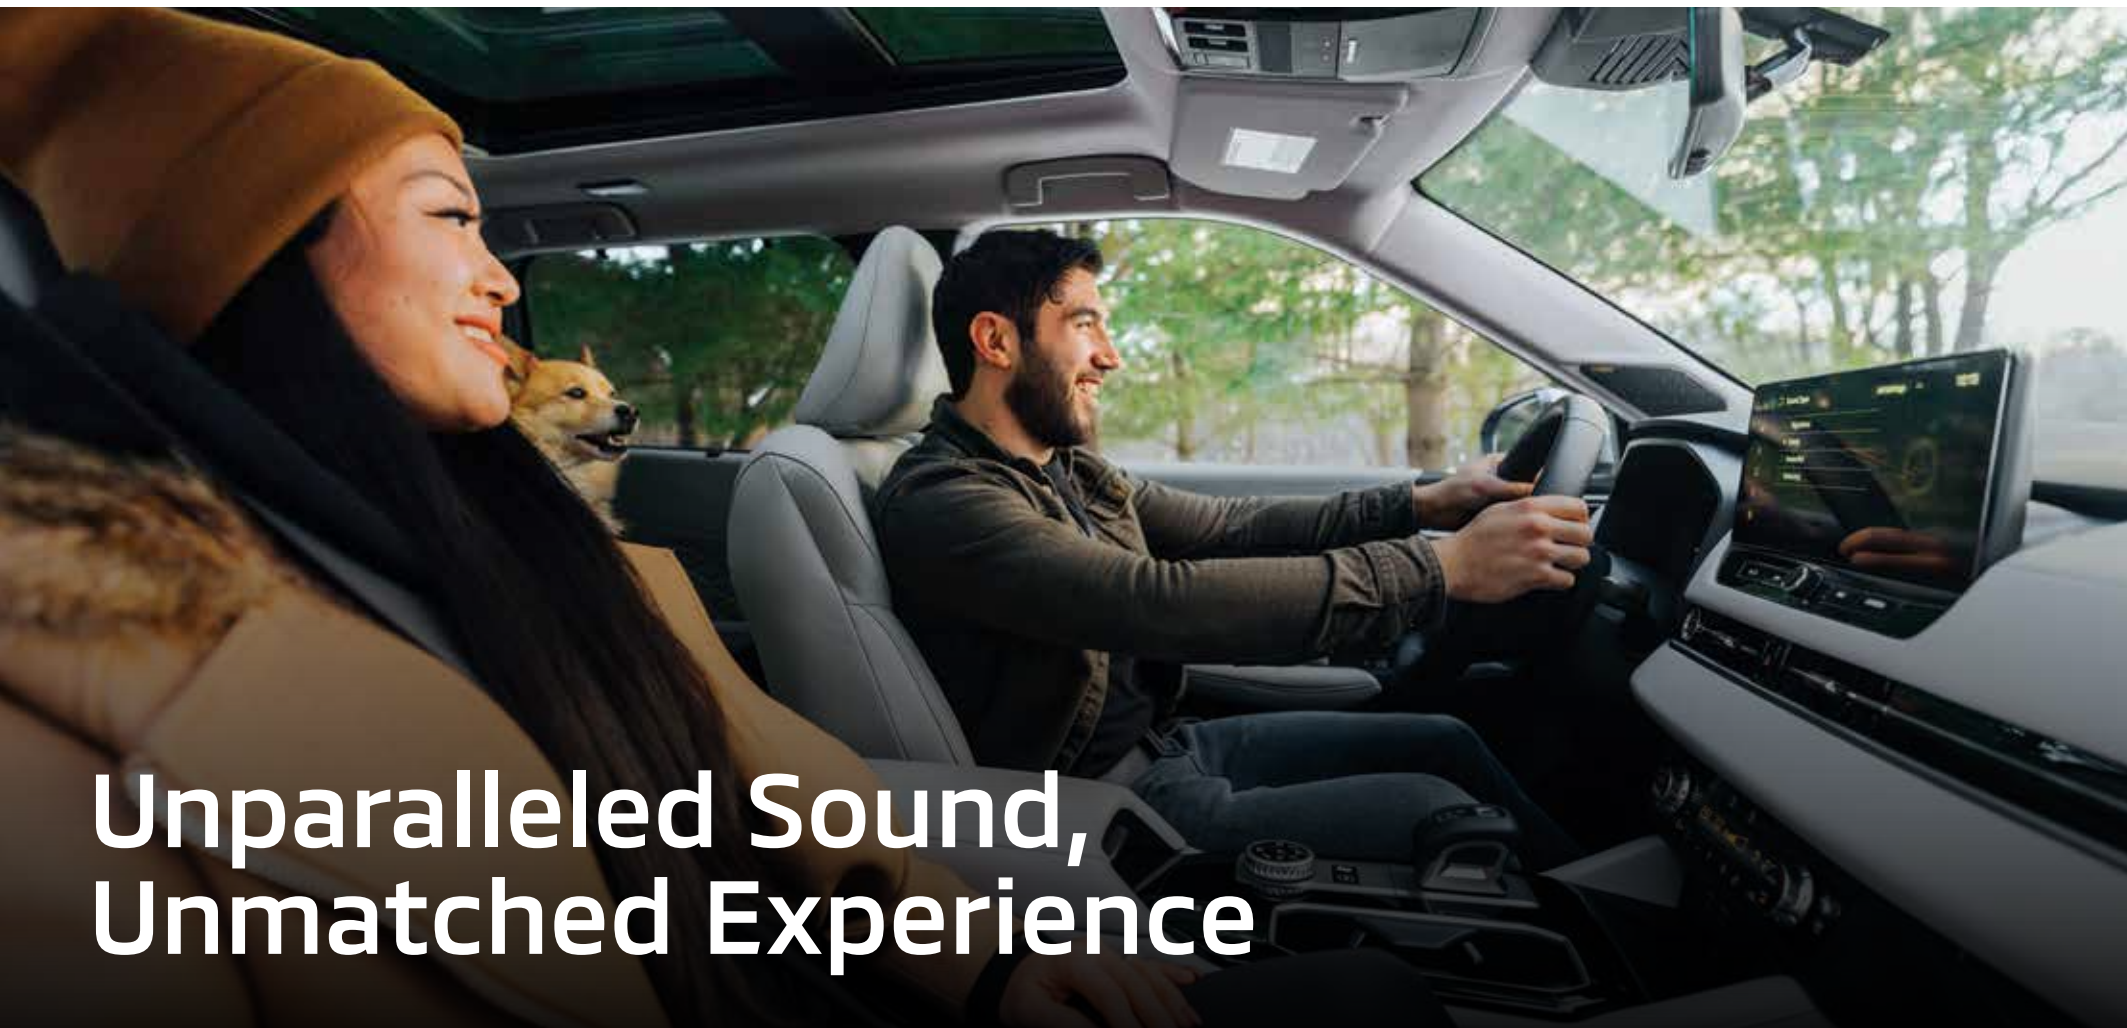

The available Front Seat Massage Function features multiple settings for improved personal wellness and stress relief.

A wide and stable posture, standard High-Grade LED Headlights, available 20" Two-Tone Alloy Wheels, horizontally sculpted body and bold front and rear skid plate styling convey a refined confidence born from genuine capability.

The standard, wide 12.3" Smartphone-link Display Audio system features an intuitive touchscreen, crisp graphics, and all the latest innovations in infotainment connectivity including Wireless Android Auto™, Wireless Apple CarPlay<sup>2</sup> and Bluetooth®. With a complimentary 3-month SiriusXM or available SiriusXM 360L<sup>S</sup> trial, you can stream your favourite ad-free music, sports, news, comedy and more with access to exclusive content and the most innovative features ever offered in a vehicle.

# Unparalleled Sound, Unmatched Experience

**YAMAHA**

The Dynamic Sound Yamaha audio systems have been jointly crafted by Mitsubishi Motors engineers and world-renowned Yamaha Sound Meisters specifically for the Outlander PHEV, to deliver a precision-crafted sound space within a precision-crafted vehicle.

## Dynamic Sound YAMAHA Ultimate / Premium

The Dynamic Sound Yamaha Premium system features 8 high-performance speakers, including custom-designed combination rear tweeter/woofers, to provide an acoustic experience that redefines the relationship between music and driving.

The Dynamic Sound Yamaha Ultimate system features a 12-speaker system that includes mid-range and woofer speakers utilizing the ZYLON® technology of Yamaha's premium flagship NS-5000 home speaker system.

The high-fidelity audio experience is based on acoustic technologies developed by Yamaha for concert halls and then optimized for the Outlander PHEV to provide a live performance quality with crisp, immersive sound that ignites the spirit for adventure.

Dynamic Sound Yamaha Ultimate system shown.

Dynamic Sound Yamaha Ultimate has been optimally tuned for each type of audio output and for each seating position within the vehicle. The system can also automatically adjust volume and equalization based on external factors that affect sound quality, including speed, rain and air conditioning noise.

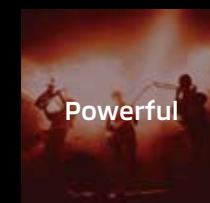

## Ideal Sound Experience:

Dynamic Sound Yamaha Ultimate includes four pre-set sound modes that have been fine-tuned to accentuate your favourite music genre.

**Signature**

Brings out the emotive tones and textures of vocals and complex instrumentation of Jazz, Blues, and Classic tunes.

**Powerful**

Feel the power of rock or hip hop music coursing through you, elevating your mood and the drive.

**Lively**

Ideal for energetic dance and pop music beats and crisp vocals.

**Relaxing**

Enjoy a pleasant conversation and appreciate the scenery complemented with background music.

# The Space to Go Further, Together

With standard seating for up-to 7 passengers, up-to 1,832 L (64.7 cu.ft.) of cargo space, and a towing capacity of up-to 680 kg (1,500 lbs)\*, the Outlander PHEV makes daily commutes and adventure-packed family weekend escapes effortless and unforgettable.

## Storage

Front seat cupholders are conveniently located beside the transmission shifter, with each cup holder thoughtfully tilted away from each other, so both the driver and passenger can easily access their extra-large morning coffees. The large centre armrest opens up to keep items such as smartphones and other valuables away from prying eyes. There is also an illuminated USB-C port inside the armrest, plus two additional illuminated USB-C ports on the rear of the armrest for 2nd row passengers, to keep phones and tablets fully charged.

## Hands-Free Power Liftgate

The available foot-activated Hands-Free Power Liftgate is height adjustable, allowing for convenient and easy access to the cargo area, without having to put anything down.

## 1,500W Power Supply

Enjoy the creature comforts of home while out and about with a standard 1,500W Power Supply that powers two common 120 Volt household outlets—a convenient addition to your camping trip, or a perfect opportunity to power the kids' larger handheld devices.

# A Wide Range of Features to Keep You Connected

Innovative and purposeful innovations abound, ensuring that you stay connected—to family, friends, and the road.

## Available 10.8" Head Up Display

Projects important information on the windshield, allowing you to keep your eyes on the road ahead.

## Available Frameless Digital Rearview Mirror

Leverages camera technology to help drivers to see what's behind them, even if visibility is impacted when the cargo area is packed to the roof.

## Available Smartphone Wireless Charger

Located at the front of the centre console and angled for easy access.

## Available 12.3" Full Digital Driver Display

Provides engaging graphics that display customizable information like speed, navigation, S-AWC settings and more.

## Who Says Adventure Can't Be Comfortable?

## Available 3-Zone Automatic Climate Control

System provides personalized comfort for the driver, front passenger, and 2nd row passengers.

## Available Rear Door Pull-Up Sunshades

Offer protection for 2nd row passengers on sunny days, especially when the passengers are sleeping children.

## Available Key-Linked Memory Settings

With the Power Driver's Seat Memory function, the exterior mirrors and Smartphone-link Display Audio profile are linked to each FAST-Key, allowing for two individual driver's settings.

## Available Heated, Power-Folding Side-View Mirrors with Reverse Auto-Tilt

Automatically tilt down for enhanced visibility to help see objects, lane markings or curbs while parking, and fold when the vehicle is locked to protect them in tight parking spaces.

## \*MITSUBISHI CONNECT EV Services

Monitor and control your Plug-in Hybrid Electric Vehicle features from anywhere, including the ability to charge your Outlander PHEV when it's convenient for you, or during off-peak energy times to reduce your overall electricity bill.

## \*MITSUBISHI CONNECT Remote Services

Use your Smartphone to start your Outlander PHEV to pre-heat or pre-cool the cabin; automatically lock or unlock your doors; find your vehicle in a parking lot; check your vehicle's status and set parental controls.

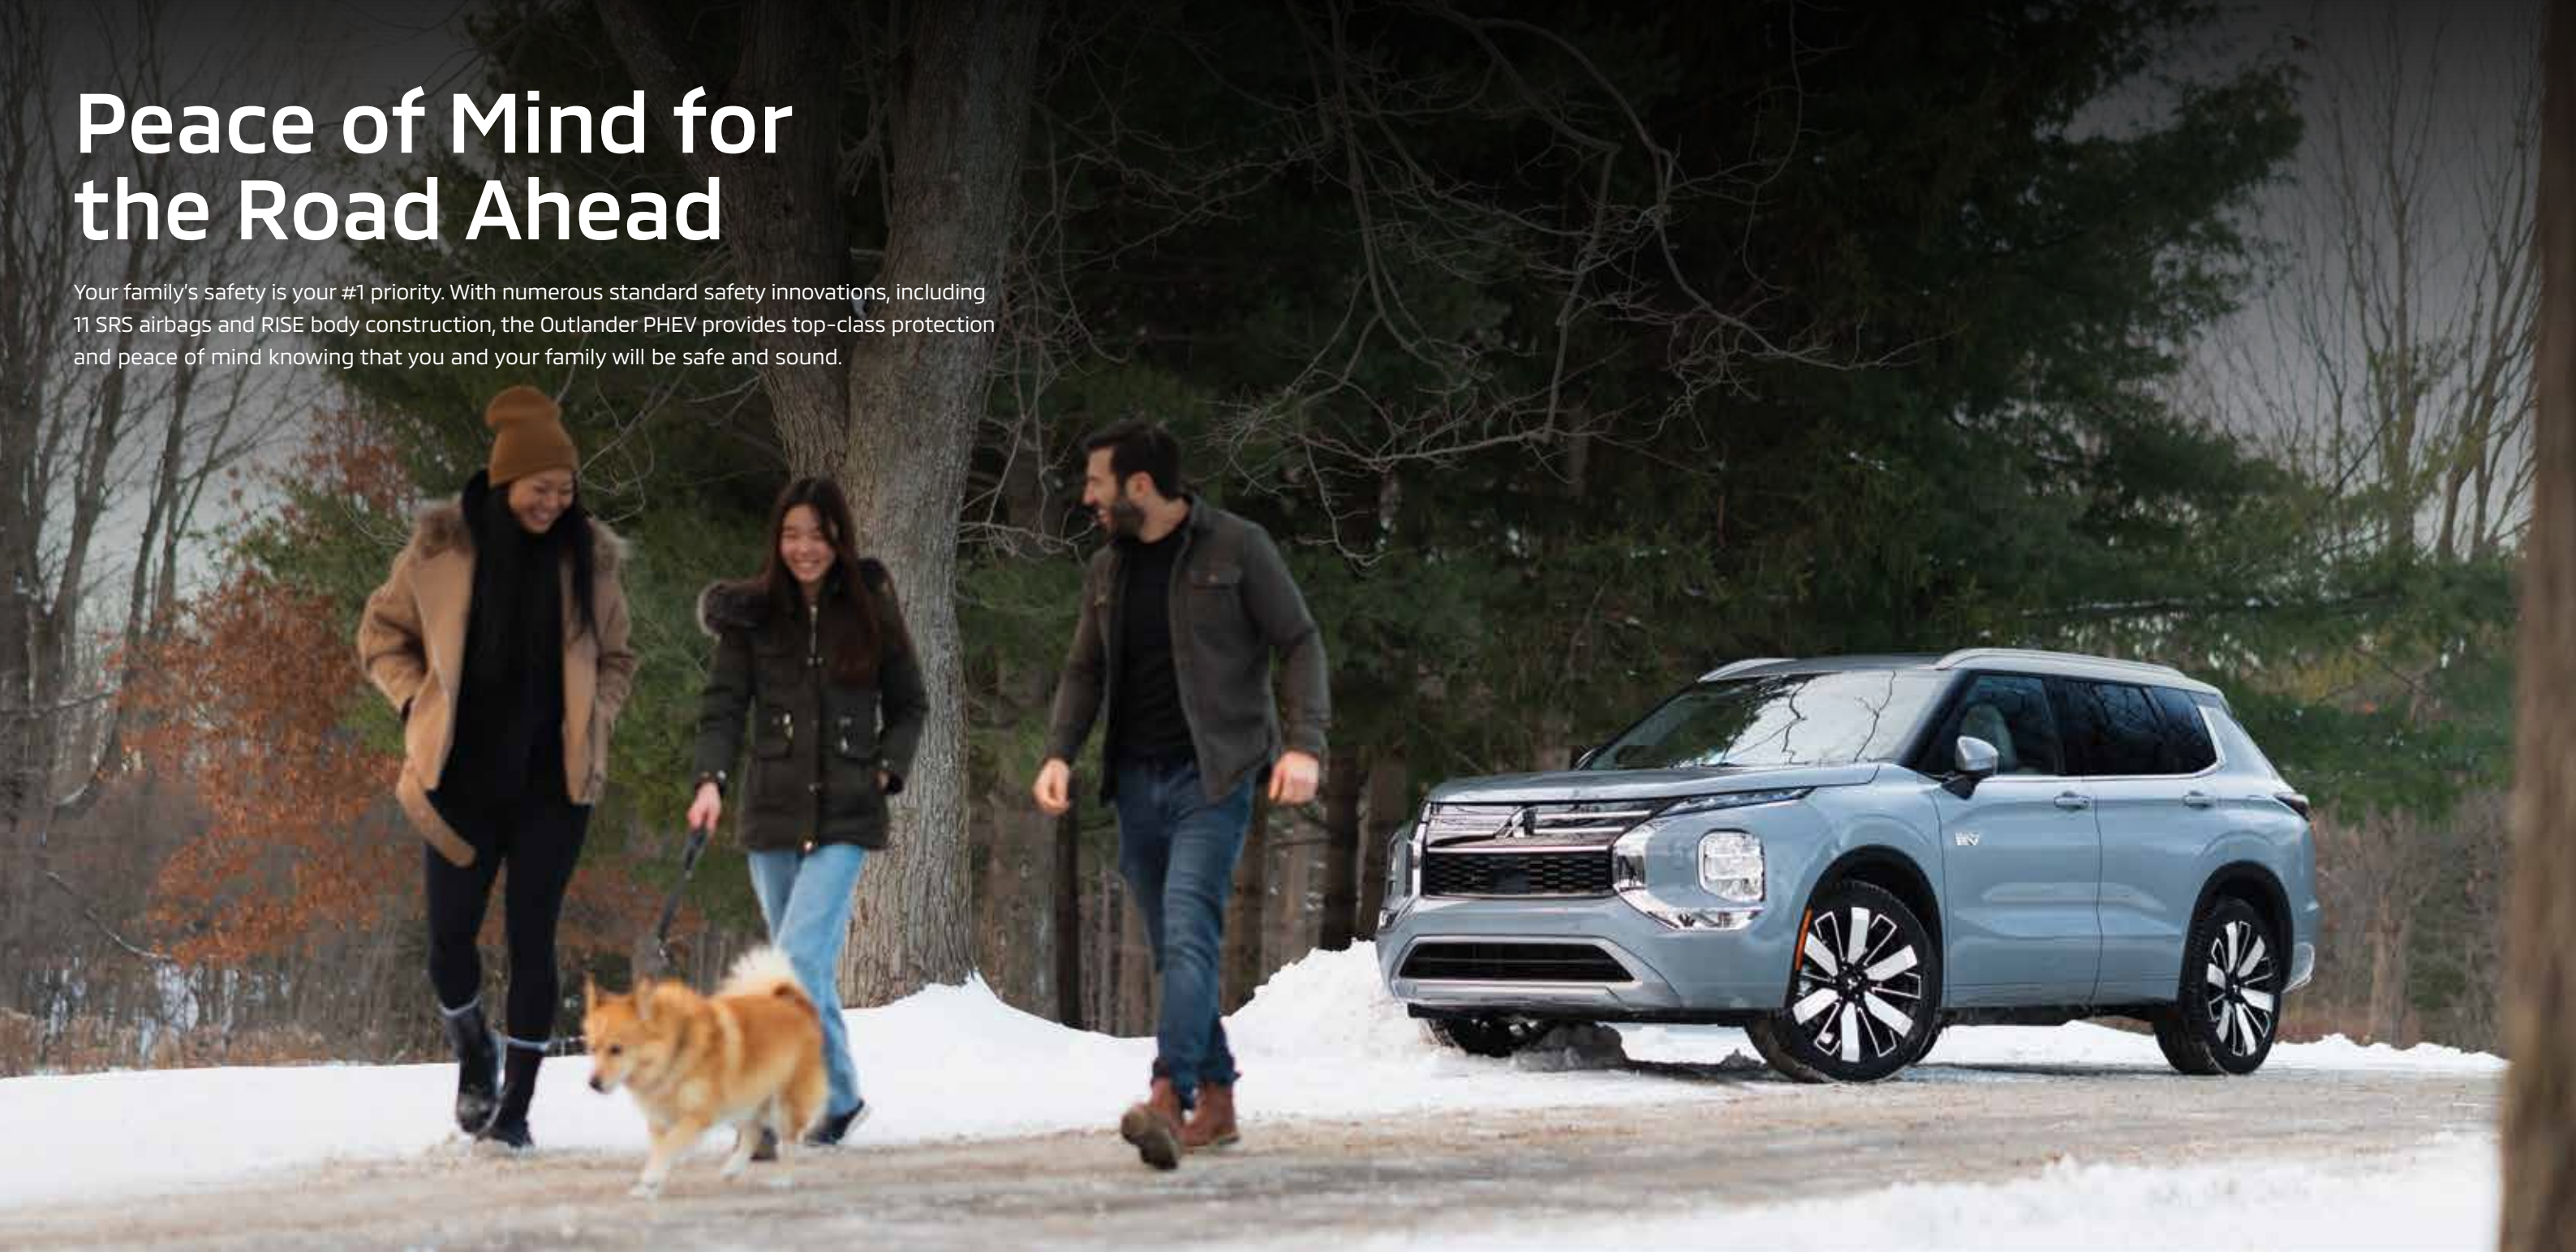

## \*MITSUBISHI CONNECT Safeguard Services

Connect with the Mitsubishi Motors call centre instantly in emergency situations—automatically when in a severe collision, or by pressing the SOS button; or arrange for roadside assistance when you need it. No matter the situation – the Outlander PHEV has got you covered!

Also included with MITSUBISHI CONNECT Safeguard Services is a suite of modern Navigation Services powered by Google, to help you plan your perfect route, including Google Satellite & Street Views and seamless map transition between your phone and the Smartphone-link Display Audio system and back.

# Peace of Mind for the Road Ahead

Your family's safety is your #1 priority. With numerous standard safety innovations, including 11 SRS airbags and RISE body construction, the Outlander PHEV provides top-class protection and peace of mind knowing that you and your family will be safe and sound.

## The Confidence to Keep Moving

The Outlander PHEV is packed with an abundance of advanced driver assistance systems, including the available MI-PILOT Assist, which in combination with autonomous driving features helps keep the vehicle centered in the lane of travel and works to reduce fatigue on long trips.
